Key Terms and Definitions for the Federal Funds Worksheet

Carl D. Perkins Career and Technical Education Act: Perkins Act programs are intended to enhance educational opportunities for all career and technical education students at public secondary and postsecondary schools. Funds are disseminated to states, which in turn allocate funds by formula to secondary and postsecondary schools. Funds that are directed to public secondary and two-year postsecondary schools are used for program improvement, including equipment, curriculum development, and professional development.

Direct Loan (DL) Program: The DL program helps make low-interest, variable rate loans available to students and their families to pay for the costs of attending postsecondary institutions. Direct loans are those provided directly through the federal government. The federal government pays the loan interest for students with demonstrated need while they are in school and during grace and deferment periods.

Federal Supplemental Educational Opportunity Grants (FSEOG): The FSEOG program provides an additional source of grant aid for exceptionally needy students. Supplemental Grant recipients use these funds in combination with other types of grants, loans, and work-study aid to meet their total educational expenses. Any academically qualified student may apply for aid to complete a certificate or degree program. Priority for FSEOG awards are Pell Grant recipients. The federal share of the award under the program cannot exceed 75 percent; the remaining 25 percent of the award must be contributed by the participating institution. The grants range from a minimum of \$100 to a maximum annual award of \$4,000.

Pell Grant: The Pell Grant program is a needs-based program and grants are awarded to eligible undergraduate students who have not yet earned a bachelor's degree. For many students, Pell Grants provide a foundation of financial aid to which other aid may be added. To determine eligibility for a Pell Grant, the U.S. Department of Education uses a formula established by Congress. This formula evaluates financial information a student supplies, the cost of attendance at their institution, full- or part-time status, and whether the student attends for a full academic year or less. The maximum award for the current award year (2022-23) is \$6,895. Approximately 3 million community college students receive Pell Grants annually.

Strengthening Institutions and Minority Serving Institutions (MSI) Grants: MSIs are colleges and universities serving a large percentage of minority students, including: Hispanic-Serving Institutions; Asian American and Native Pacific Islander-Serving Institutions; Native American-Serving Institutions; Predominately Black Institutions; American Indian Tribally Controlled Colleges and Universities; Native Hawaiian-Serving Institutions; and Alaska Native-Serving Institutions. Most of the funds for these programs are formula based for institutions certified by the Department of Education. Title III, Part A – Strengthening Institution grants are competitive grants for institutions with relatively limited resources and serving a high percentage of needy students.

TRIO: TRIO is a compilation of five programs that provide direct outreach and student support services to high school, college and university students. The programs are designed to encourage individuals from disadvantaged backgrounds to enroll in and complete college. By law, at least two-thirds of the students served by TRIO programs must be the first in their family to attend college.

Work-Study: The Federal Work-Study program leverages resources from schools and the private sector to provide opportunities for students to earn money to pay for college. The program is also designed to encourage students receiving federal financial aid to participate in community service. In addition to providing self-help assistance to students, Federal Work-Study funds help support partnerships between the federal government, postsecondary schools, students, and communities.

Strengthening Community College Training Grants (SCCTG): The Strengthening Community Colleges Training Grants Program (referred to as Strengthening Community Colleges or SCC) aims to build the capacity of community colleges to collaborate with employers and the public workforce development system to meet local and regional labor market demand for a skilled workforce. The grants also build the capacity of community colleges to address challenges associated with the COVID-19 health crisis, such as expanding online and technology-enabled learning and migrating services to a virtual environment.
